

InfoTrack Personnel Tracking System (PTS)

InfoTrack has identified Real time data gathering, Security management especially at sea ports, airports and other sensitive establishments as key areas requiring personnel tracking system. Security of a person is of paramount importance these days. Be it a child attending the school, a person carrying high valuable goods, reporters, Vacation goers, Park maintenance personnel etc can be tracked down using this personnel tracking device. Authorities or users can access InfoTrack application using an internet connected PC where the location of the person/ Vehicle can be seen on a digital map that helps in instantly understanding where the person is. The person carrying the personnel tracking device can send an SOS alert to the control centre. The application not only allows tracking but also helps in generating plethora of reports that capture the movement, location, areas frequently visited and how long the person remained at a particular location etc that aides in better analysis.

InfoTrack has come up with a revolutionary portable transponder which is designed for quick and easy deployment. Despite its small footprint, it is a sophisticated state of the art device that does not compromise on accuracy, quality and functionality. With its inbuilt antenna and running on readily available mobile phone charger and batteries, it can easily function up to 10 hours on a single charge. It can support GPS/GSM (SMS, GPRS – TCP/IP, UDP) which makes its deployable to a wide range of applications. Sports - marathon runs, sailing regattas to car rally events world wide. Distribution oriented companies will find the InfoTrack to be useful as they can do route planning and delivery scheduling using the system. Besides all these, other usages are temporary monitoring for security reasons, surveillance of objects in secured areas as well as in the field deployment.
